Mobin Azimipناه is an AI Engineer with dual M.Sc. degrees in Electrical Engineering - Computer Science from Polytechnic University of Milan and University Grenoble Alpes. Currently at Hermes Corporate, he consults on AI infrastructure for Baker Hughes, building services with FastAPI, MLflow, and AWS. His expertise includes developing retrieval-augmented generation systems, fine-tuning LLMs with LoRA and quantization, and orchestrating multi-agent workflows using AutoGen and GraphRAG. He has delivered a RAG system covering 90% IP content in minutes and contributed to prompt engineering for frontier models. Proficient in Python, PyTorch, Docker, and full-stack development, he also led hackathon projects and holds certifications from Stanford, DeepLearning.AI, and Google Cloud.
